

2022 STREET MAINTENANCE PROJECT

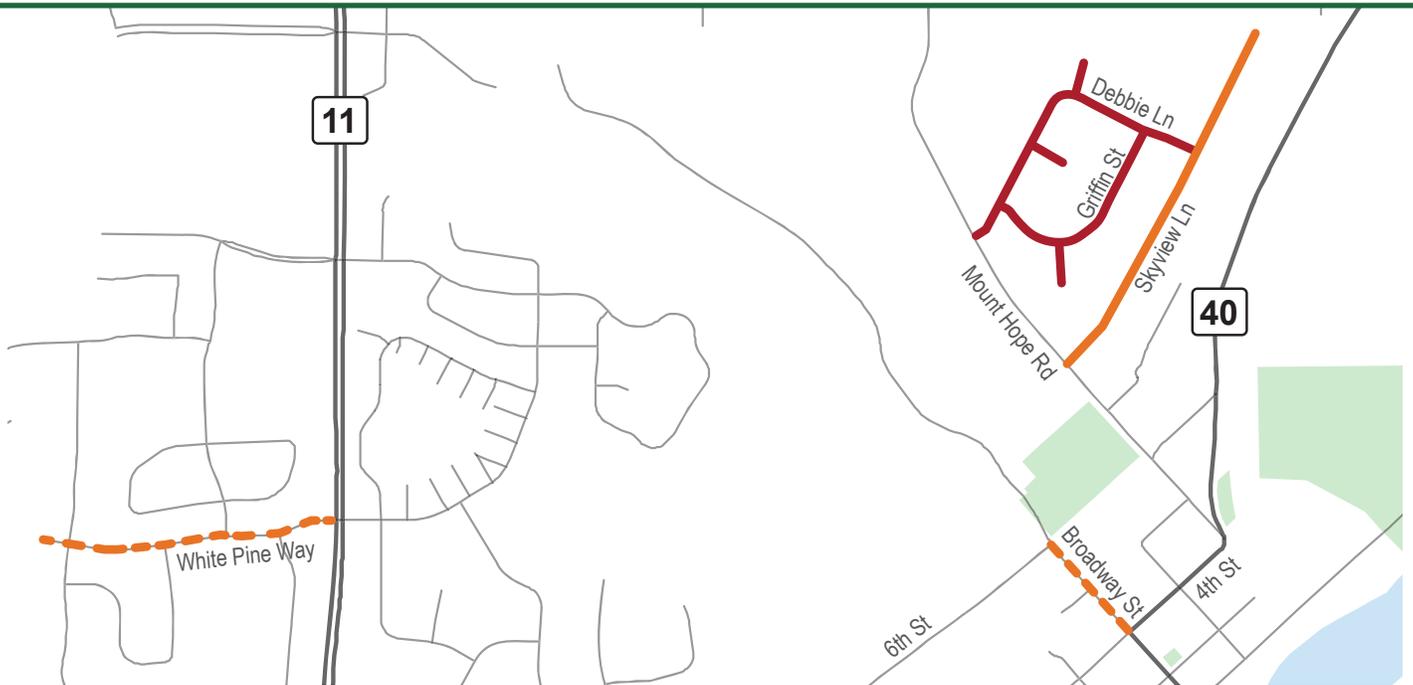

ABOUT STREET MAINTENANCE

The City of Carver currently owns and maintains approximately 26 miles of local streets within the city. As these streets continue to age and new streets are added, it's important to approach street maintenance in a strategic fashion to extend pavement life as long as possible.

2022 STREET MAINTENANCE PROJECT AREAS

Reclamation

Debbie Lane, Debbie Circle, Griffin Street and Griffin Circle

Grind existing pavement and gravel base into a new uniform base material. Grade and compact, then pave new layer of asphalt.

Mill and overlay

Skyview Lane

1. Remove the top layer of asphalt (milling)
2. Pour, level and bind new layer of asphalt (overlay)

Seal coat protection

White Pine Way west of Jonathan Carver Parkway and Broadway between 6th St. and 4th St.

Apply a new coating (or seal) to pavement to provide protection against sun, water, oils, salt and other damaging elements.

Visit: www.CityOfCarver.com or call 612-790-1721 for project details.

2022 STREET MAINTENANCE PROJECT

PROJECT OVERVIEW

The City Council recognized the need for a standard approach to street maintenance and adopted its first Pavement Management Plan in the fall of 2021. The first year of the plan is 2022, with a focus on the Eagle Ridge neighborhood. Residents can expect the project to include combination of reclamation as well as mill and overlay. A second portion of the project includes seal coating along White Pine Way (west of Jonathan Carver Parkway) and on Broadway (from 6th Street to 4th Street).

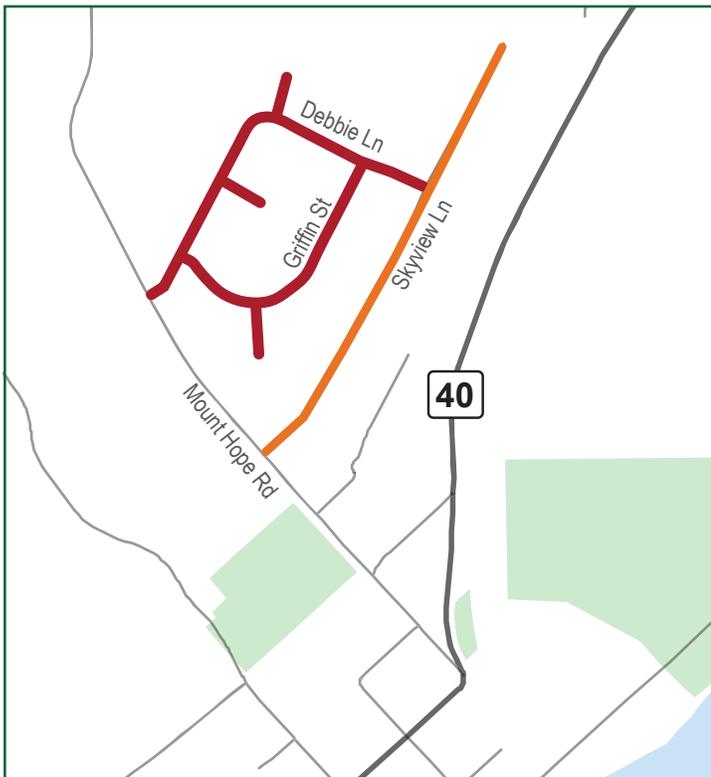

These street maintenance projects will be funded as part of the 2022 budget using Street Maintenance and Special Capital funds with no assessments proposed to residents within the project areas.

PROJECT SCHEDULE

From now until spring, the project team will be designing the projects for 2022. During this time, residents and motorists will see City Engineering and Public Services staff on site inspecting existing utilities that may need to be maintained with the project. Soil boring inspection will begin the week of January 24 in the area shown below. Project construction is scheduled to begin in early summer of 2022.

UPCOMING WORK

SOIL BORING INSPECTION

In preparation for general construction this summer, soil boring inspection will begin the week of January 24 in the Eagle Ridge neighborhood (left).

Traffic delays are not expected, but motorists should be aware of survey crews on-site.

Visit: www.CityOfCarver.com or call 612-790-1721 for project details.
